

How does my video respond to the Truism that I picked? To help you answer this question, think of what your video emphasizes about the Truism.

I picked "Eating too much is criminal." My video responds to this by showing a person who is upset with how much they are eating. It depicts someone who is battling with an eating disorder and is very much ashamed of it. So while they believe it is "criminal" to be eating that much, they cannot help themselves.

Second Video

The second video responds to the prompt by showing someone who believes that there should be consequences for overeating, and in this case, they are punishing themselves by throwing up what they have just eaten.

Added Sound

I added an ambient sound taken from one of my favorite sounds. Personally, I feel that this creates an eerie and helpless feeling that is already sort of displayed in the videos by themselves. The sound itself is about feeling isolated from a group of people, and I feel that the videos and Truism I chose also represent a feeling of isolation.
